

SECTION 3.1- FIELDS FOR ALPHABETS A-F

This section includes the field name, default label on page, length, type, format, record reference, translate values, legacy system, and legacy name. Note: The default label name identifies the most commonly defined use of the fields as they appear on a page. The default label information was used as documentation although a field can have more than one label. Also, some of the default label descriptions are blank or misspelled. The goal was to document the default label descriptions as closely as possible to what is currently in the system.
